ADVANCED

NINETY-DAY PROTOCOL

You already train and you already do some of this. This closes the gaps and measures what you have been doing on faith.

Circadian protocol

ADVANCED

Everything in this program depends on this section. If you do nothing else in the first two weeks, do this.

Your body runs on a clock, and the clock is set by light. Morning light tells every cell what time it is. Darkness at night lets the repair cycle run. When the clock is right, food is handled correctly, hormones release on schedule, and sleep does its job. When the clock is wrong, nothing downstream works, no matter how well you eat or train.

The sequence, every day:

LIGHT → WATER → MOVEMENT → FOOD → MOVEMENT → LIGHT → DARKNESS

Go outside as soon as you wake up

What to do: Outside within 30 minutes of waking. Twenty minutes on a clear day, forty when cloudy. Face east. Barefoot on the ground the whole time. No sunglasses, no window.

Why: Your body has a clock inside it. The clock does not know what time it is until it sees the sun. When morning light hits your eyes, it tells every cell in your body that the day has started. That one signal sets up your energy, your hunger, your hormones and your sleep for the whole day. If you skip it, your body runs on the wrong time all day, like a clock that was never set.

Get sun on your skin in the afternoon

What to do: Fifteen to thirty minutes of sun on your arms and torso around noon. Fair skin starts at ten minutes and builds up.

Why: Morning light sets the clock. Afternoon sun charges the battery. Sunlight on your skin makes vitamin D, which almost everyone is low on, and it releases a chemical that relaxes your blood vessels and lowers blood pressure. A little bit every day does more than a lot once a week. You are not trying to tan. You are trying to get the signal.

Watch the sun go down

What to do: Outside for the last fifteen minutes of light.

Why: The light at sunset is red and orange. That color tells your body the day is ending and it is time to start making melatonin, the hormone that makes you sleepy. Seeing the sunset is how your body knows to begin winding down. Skip it and your body does not get the message, and then you are wide awake at midnight wondering why.

Put on your glasses when the sun goes down

What to do: Amber or red lenses from sunset. Incandescent or red bulbs in every room you use after dark. Screens filtered with Iris and a blue-blocking film.

Why: After sunset, your body expects darkness. Light bulbs and screens give off a blue light that looks like daytime to your brain. Your brain sees it and stops making melatonin, and that is why you cannot fall asleep even when you are tired. Amber or red glasses block the blue. So do warm bulbs and screen filters. It is not about the brightness. It is about the color.

Make the bedroom dark and quiet

What to do: Phone in airplane mode and out of the bedroom. Router off at the wall. Blackout curtains. Grounding sheet. Room at 65°F.

Why: Your body does its repair work while you sleep, and it can only do it in the dark. Even a small light, like a phone screen or a charger glow, can be enough to keep the repair from starting. The phone also keeps your brain on alert, waiting for a buzz. Out of the room means your body can finally switch off.

Stand barefoot on the ground

What to do: Twenty minutes barefoot every morning with the light block. Grounding sheet at night.

Why: The earth carries a natural electric charge. When your bare skin touches grass, soil or sand, your body connects to it. Shoes with rubber soles block that connection, and most people go weeks without ever touching the ground. We stack this with the morning light so it is one habit, not two. You are outside anyway. Take your shoes off.

Give your body hours with no food

What to do: Eating window 7am to 3pm. That is a 16-hour fast every night. One 24-hour fast every two weeks on a non-lifting day.

Why: Every time you eat, your body has to stop what it is doing and deal with the food. If you eat from the minute you wake up until right before bed, your body never gets a break to do repairs. Hours without food, especially overnight, is when the cleanup happens. Late eating is the worst, because your body is trying to wind down and you just handed it a job.

The rule that matters most: light before food, every single day. Do not eat until you have been outside.

Water and minerals

The morning glass

Before coffee, before food, before anything: 16 to 24 oz of mineral water with a pinch of Baja Gold sea salt and 1 to 2 oz of pure organic lemon juice. Empty stomach. It is the first thing the body receives after light.

Through the day

Three liters minimum, four on sauna and training days. Every bottle gets a pinch of Baja Gold, because water without minerals passes through and takes minerals with it. Most of it before your last meal.

What to drink

Crazy Water #4, Saratoga or Icelandic Glacial as bottled water. At home, reverse osmosis with Baja Gold added, a quarter teaspoon per liter. Baja Gold for cooking. Nothing else.

Movement

Resistance, four days

Day A: pistol or weighted squats, weighted dips, pull-ups, Nordic curls. **Day B:** single-leg deadlift, handstand push-up progression, rows, farmer carries. Days C and D repeat A and B with more volume. Five sets of five to eight. Add load when you clear eight on every set.

Zone 2, three sessions of 60 minutes

Heart rate at 180 minus your age. Conversational pace.

Intervals, twice a week, never consecutive

Norwegian 4×4. Hill sprints, assault bike or rowing.

Walking

Ten to fifteen minutes after every meal, within twenty minutes of finishing. Ten thousand steps.

Grip

Dead hangs, three sets to failure, three times a week.

Food

Window: 7am to 3pm

Two meals. No snacks. Nothing after 3pm but water and tea.

First meal

A full tin of sardines in olive oil, or three pastured eggs in butter. A full bowl of leafy greens. A serving of fermented vegetable. Olive oil over everything.

Second meal, by 3pm

Grass-fed beef, wild salmon or lamb, 8 to 10 oz. Two cups cruciferous vegetables. Avocado or olive oil. Sea salt.

Every day

Sardines or wild salmon. Leafy greens. One fermented food. Eggs four times a week minimum. Liver once a week.

Protein

2 grams per kilogram, every day.

Out for 90 days

Gluten, all seed oils, added sugar, alcohol, nightshades, legumes, grains. Dairy limited to grass-fed butter and aged cheese.

The full approved food list, the daily non-negotiables and the cookbook are in the Dietary Guidelines document.

Heat and cold

Sauna, five to seven days

Traditional sauna at 175 to 195°F, twenty minutes. Two rounds if you have time. Rehydrate with mineral water and Baja Gold.

Cold, four days

Three to five minutes at 50°F or below.

Contrast, one designated day

Sauna then cold, three rounds.

Cold goes after zone 2, never after resistance training. If you lift in the morning, cold is in the evening or on a non-lifting day.

Sleep

Same bedtime, same wake time, seven days a week. Room cool and completely dark. Last food three hours before bed. Phone out of the bedroom.

Room at 65°F. Grounding sheet. Nasal breathing. If you snore, mouth tape.

Supplements

Morning, with the first meal

Pure Encapsulations O.N.E. Multivitamin, 1. EPA/DHA Essentials, dosed to your Omega-3 Index: under 4% take 2,000 mg, 4 to 6% take 1,500 mg, over 6% take 1,000 mg. Vitamin D3/K2 liquid, 5,000 IU, adjusted after labs. Creatine, 5 g. Dragon Herbs Super Adaptogen, 3. Spirulina powder (Nutrex Hawaii), 1 tablespoon. Cowboy Colostrum, 1 scoop on waking before anything.

Midday

Dragon Herbs Duanwood Reishi, 2. Gaia Turmeric Supreme, 1. Quicksilver Liposomal Glutathione, 1 pump.

Afternoon, empty stomach

Dragon Herbs Spring Dragon Longevity Tea. Vital Proteins Collagen, 20 g in the tea with lemon.

Evening, two hours before bed

Chlorella powder (Sun Chlorella), 1 tablespoon, alone. Magnesium Glycinate, 400 mg. Glycine, 3 g. Gaia Nighttime HPA, 2. Dragon Herbs Lights Out as needed.

Three mornings a week

Dragon Herbs Tonic Alchemy, 1 scoop, in place of the multivitamin.

If you are training hard and still tired: the Jing stack, 30 days

Super Adaptogen 3 morning and 3 midday. He Shou Wu, 3 morning. Cordyceps, 2 pre-training. Deer Antler Drops, 1 dropper morning, 21 on 7 off. Gaia Daytime HPA, 2 morning and 2 afternoon. Then back to the base stack.

Equipment and sourcing

Dr. Pittman takes no commission on anything listed here. These are what he uses.

Evening glasses	Ra Optics Sunset (amber) or Night Shift (red). BLUblox Sleep+. TrueDark Twilight. They must block 460 to 490 nm. Ask for the transmission spectrum.
Screens	Iris (iristech.co) on every computer, Health mode after sunset. f.lux is the free alternative. BlockBlueLight or Ocushield film on monitors. BlockBlueLight filter on the TV.
Bulbs	Incandescent wherever you can find them. Otherwise BlockBlueLight or Bon Charge red bulbs for evening rooms.
Router	Mechanical outlet timer, off 10pm to 6am. About twelve dollars.
Grounding	Earthing.com or Hooga sheet for the bed, mat for the desk. Test your outlet with a three-dollar tester first.
Water	Crazy Water #4, Saratoga, Icelandic Glacial. APEC or iSpring under-sink RO at home. Baja Gold sea salt.
Sauna	Gym sauna for most. Sun Home or Almost Heaven barrel for a home unit. Traditional, not infrared.
Cold	Cold shower to start. Ice Barrel or a chest freezer conversion with a GFCI for a home plunge.
Testing	OmegaQuant Omega-3 Index kit, day 0 and day 90. Camry grip dynamometer.

Three phases

Days 1 to 30	Stop the drain. Sugar, alcohol and seed oils out. Sleep window fixed. Morning light non-negotiable. Log daily.
Days 31 to 60	Recharge. Protein target. Full training schedule. Sauna and cold at full frequency. Window at 7am to 3pm.
Days 61 to 90	Build capacity. Load goes up. First 24-hour fasts. Day 90 draw.

Daily checklist

This is what goes in the log. Under a minute.

- | | |
|---|---|
| ☐ Outside within 30 min of waking, 20+ min, barefoot | ☐ Sunset outside |
| ☐ Morning glass | ☐ Sauna or cold |
| ☐ Training or zone 2 | ☐ Amber glasses from sunset |
| ☐ Both meals inside 7am to 3pm | ☐ Three liters of water |
| ☐ Walk after each meal | ☐ Phone out of room, fixed bedtime |
| ☐ Midday sun | ☐ Logged |

The Human Battery Project is an educational wellness program, not medical treatment. It does not diagnose or treat any condition and does not replace your physician. Any laboratory result outside the reference range is referred to a physician. If you take prescription medication, review the supplement list with your prescriber before starting. Stop and seek medical care for chest pain, fainting, or any new symptom that concerns you.
